SIEMENS

PI Advanced Flow Service Training - FC400 (AST-FC400)

Objectives

This 1-day course is focusing on the technology, commissioning and troubleshooting issues for the flow technology. The course includes hands-on training and troubleshooting exercises. This is a great opportunity to discuss these flow applications etc. in an open forum with other experienced participants and Technical Support Specialists from the Flow Center of Competence in Sønderborg, Denmark.
NOTE: This course can be booked individually but is also part of a two week training program.
