

## SIMATIC TIA Portal Service 2 (TIA-SERV2)

---

### Objectives

---

The Totally Integrated Automation Portal (TIA Portal) forms the work environment for integrated engineering with SIMATIC STEP 7 and SIMATIC WinCC. The second part of the SIMATIC TIA Portal service training is based on the knowledge of the TIA Portal gained in the SIMATIC TIA Portal service 1 course, including SIMATIC STEP 7, HMI, connection of drives, and PROFINET IO. You will expand your troubleshooting and error correction knowledge using the TIA Portal diagnostic tool in the commissioning and productive phase. Alarms are displayed on an operator control and monitoring system. You will learn about the included test functions for controlling programs in Structured Control Language (SCL). You will implement a sequence control in SIMATIC S7-GRAPH and integrate the analog value processing. You will thus be able to adapt your plant to new demands and to reduce downtime.

#### Objectives

After attending the course, you can do the following:

- Understand the interaction of TIA components
- Understand, adapt, and expand given STEP 7 programs, including with step sequences and analog value processing
- Systematically diagnose and correct hardware and software errors in the SIMATIC S7 automation system with the diagnostic tools of the TIA Portal engineering portal
- Use the test functions in Structured Control Language (SCL)
- Perform specific commissioning of TIA components
- Adapt your WinCC configuration to new requirements through small modifications or extensions

You can deepen your theoretical knowledge with numerous practical exercises on a TIA system model. This consists of a SIMATIC S7 automation system, ET 200 distributed I/O, Touchpanel, drive, and a belt model.

### Target Group

---

Servicepersoneel  
Operatoren, gebruikers  
Onderhoudspersoneel

### Content

---

Hardware diagnostic functions of the TIA Portal in the SIMATIC S7 automation system  
Software diagnostic functions of the TIA Portal in the SIMATIC S7 automation system  
Possible applications of various block types (function (FC), function block (FB), organization block (OB), data block (DB))  
Principles of analog value processing  
Sequence control with S7-Graph  
Commissioning of distributed I/O on PROFINET IO  
Alarm configuration in WinCC  
Parameterization of the drive  
Test functions in Structured Control Language (SCL)  
Deeper understanding of contents through practical exercises on the SIMATIC S7-1500 system model

### Prerequisites

---

Step 7 kennis in overeenstemming met de opleiding N-TIASERV1  
U kan de online instaptest gebruiken om vast te stellen dat u de vereiste voorkennis beheerst. ([https://wbt.siemens.com/sitrain/TIA-SERV2\\_EN](https://wbt.siemens.com/sitrain/TIA-SERV2_EN))

### Note

---

Cursusdocumentatie: Engels  
Docent: Nederlands  
Dit is de tweede van drie cursussen die u op een afsluitexamen "Automation Technician Service, based on the TIA Portal" voorbereiden. Deze test maakt deel uit van het "SITRAIN Certification Program".

### Type

---

Face-to-face training

### Duration

---

5 days

### Language

---
