

## Visualization for Unified Basic Panels in SIMATIC WinCC Unified V20 (WS-WINCC)

---

### Short Description

---

Industrial applications are becoming increasingly complex. Fortunately, we simplify operation with SIMATIC WinCC Unified V20 and the new HMI Unified Basic Panels. From visualization to vertical integration: Unified prepares you for smooth operation, increased machine transparency, and easy IT/OT integration.

### Objectives

---

During the workshop, you will discover the many new possibilities to create impressive visualizations. We will guide you as you configure simple animations with faceplates and teach you how to design them. You will explore the graphical editor and screen objects, as well as functions for archiving and displaying data and connecting web clients. With numerous exercises, we will prepare you in one day to get the most out of SIMATIC WinCC Unified V20.

### Content

---

Designing user interfaces in SIMATIC WinCC Unified V20  
Creating simple animations  
Designing, configuring, and using faceplates  
Exploring screen objects and the graphical editor: from IO field to Trend Control  
Archiving and displaying data  
Connecting web clients

### Note

---

For 1 workshop, you pay 220 euros (excl. VAT). If you combine 2 workshops of a full day, you pay 370 euros (excl. VAT) for both. A saving of no less than 70 euros!

### Type

---

Face-to-face training

### Duration

---

1 day

### Language
