

Learning Journeys offered by SITRAIN BeLux (BE_LJ)

Short Description

You optimally capture and retain the content of a Learning Journey through a mixture of self-learning and live modules. In the live modules you learn together with others, simultaneously and guided by a learning consultant. And the modular structure allows you to ideally integrate the units in your daily work routine and adapt them to your individual pace of learning. The SITRAIN learning consultant is, of course, available during the live modules and can also be contacted for individual coaching sessions in answering questions and individual consultation. A learning membership for completing the self-learning modules and for accessing on-demand content is included.
