

SIMATIC PCS 7 Plant Automation Accelerator Basic Workshop (ST-PCS7PAA)

Présentation

This course will give you an overview of the different applications and functions of the SIMATIC PCS 7 Plant Automation Accelerator (PAA).

Objectifs

The objective is to plan automation functions from the hardware to the software so that they can then be efficiently imported into SIMATIC PCS 7.

In this way, you will be able to create top-quality plant automation from the beginning and implement new projects much faster.

As a system integrator, you will be able to substantially improve your market position.

Using practical examples, you will learn step-by-step how to create and edit the automation function with the help of the PAA.

After attending the course, you will be able to:

- Create your own components and templates
- Utilize the potential for efficient mass engineering directly in the Plant Automation Accelerator (PAA)
- Process external signal lists efficiently
- Perform data exchange with process automation in SIMATIC PCS 7

Groupes cibles

Decision makers, sales personnel

Project managers, project workers

Programmers, configuration engineers

Programme / Contenu

Creation of Control Module Types (CMT) in the master data library of SIMATIC PCS 7

Prerequisites and installation in SIMATIC PCS 7

Basics of COMOS / PAA and graphical user interface (GUI)

Interface between PAA and SIMATIC PCS 7

Template administration in PAA

Manual creation of hardware objects incl. Extended hardware parameters

Manual creation of software objects and implementation with hardware

Supported Hardware engineering using the Configuration tool

Supported Software engineering using Engineering tasks

Function planning and extended logic

Bulk data engineering in PAA

Prérequis

Attendance of course ST-PCS7SYS is recommended

Basic knowledge of process control engineering

Practical experience in SIMATIC PCS 7 configuration

Basic knowledge of APL, as communicated in the system course or in the APL workshop (ST-PCS7APL)

Remarque

Course documentation: English

Trainer: French

Type

Formation en salle

Durée

3 Jours

Langue

en, fr, nl
