SIEMENS

IT Essentials Advanced Training (BT-I75)

Doelen

The purpose of the IT Essentials Advanced training is to give the trainees insight in the IT standard hardware and the purpose of the materials. They will learn to use Proxmox as a hypervisor and build a project on it. They will learn how tu use IaCoWbs to build a project following the Siemens cybersecurity guidelines provided by Sfera. They will extend their knowledge about certificates and do basic troubleshooting.
