

Documenting with Drafting / NX制图文档（高级）（F5142）

Objectives

In this course, you will learn to create standards-compliant detailed engineering drawings that are fully associated to your 3D model using the NX Drafting application. You will configure all drafting preferences using a preset standards file, create multi-sheet drawings with base and derived views, place associated dimensions and annotations on the drawing, and customize the drawing with view dependent edits and style changes. You will also explore techniques for working with assemblies and Product and Manufacturing Information (PMI).

Target Group

Manufacturing engineers, NC/CNC programmers, CAE engineers, detailers, and managers who need to manage and use NX

Content

- Create a drawing
- Working with drafting views
- Create and edit dimensions
- Create symbols and annotations
- Create and edit complex views
- Add PMI to drawings
- Assembly drawings

Prerequisites

Learned F5101

Type

Face-to-face training

Duration

3 days

Language

zh

Fee

7,500 CNY
