

Polarion Administration / Polarion管理（高级）（F5341）

Objectives

You will learn how install and configure Polarion on Windows and Linux platforms. Configuration includes creating templates and adding custom fields to a number of items including Work Items, Documents, Test Runs, Plans and Collections. You define users, groups and roles and assign permissions and notifications to users. You setup default favorites, configure views and maintain projects.

Target Group

Polarion Administrator, Process Engineer, IT Administrator
