

WinCC Flexible System Course / WinCC Flexible 操作员面板系统课程 (A1484)

Objectives

This course provides you the basic knowledge which is necessary for configuring machine-specific and plant-specific human machine interface tasks with the SIMATIC WinCC flexible software. The course content is supported with practical exercises on a plant model. It also consists of a S7-300 automation system and different human machine interface stations. On completion of the course, you will be able to work efficiently and create an optimal configuration with WinCC flexible for any given requirement. With confident handling, you will be able to make effective use of the engineering phase.

Target Group

Operators, service engineers, programming and commissioning engineer

Content

- Overview of SIMATIC WinCC flexible
- Creating the project
- Configuring the connections to SIMATIC S7
- Fundamentals of graphics display creation for human machine interfacing
- User administration
- Message representation, message archiving, message configuring
- Variable archiving, configuring curves, representing curves
- Recipes
- Application of Job Mailbox
- Script System

Prerequisites

Completion of course A7111

Type

Face-to-face training

Duration

5 days

Language

zh

Fee

6,000 CNY
