

## RFID-UHF Technology and Practice / 工业射频识别(RFID)超高频(UHF)技术 (A7245)

---

### Objectives

---

Upon completion of the course you are able to plan and realize RFID-UHF projects. You know the possibilities UHF technology offers and learn what has to be considered when selecting the hardware and setup of the system.

### Target Group

---

Technical sales personnel, Industry: COOs, commissioning engineers, project engineers, maintenance and service technicians

### Content

---

- Technical basics
- Antennas
- UHF field
- Import parameters
- Other countries, other regulations
- What happens at an inventory?
- Memory configuration
- Working with tags
- Requests and frame conditions of a project
- Feasibility test
- Planning of a project
- Processes and integration
- Pilot phase
- Rollout
- Optimization of projects
- Operation
- Practical exercises

### Prerequisites

---

Basic knowledge of industrial RFID and PLC programming

### Type

---

Face-to-face training

### Duration

---

4 days

### Language

---

zh

### Fee

---

7,200 CNY
