

Use Easy Plan to perform Multi-BOM management and process planning for BTO/BTS/CTS / 使用 Easy Plan 进行 BTO/BTS/CTS 的多结构管理和工艺规划（中级）（F5422）

Objectives

In this course, you develop a manufacturing BOM and a process plan for build-to-stock, build-to-order, and configure-to-order manufacturing scenarios.

Target Group

Manufacturing process engineers and assembly process planners

Content

- Overview of Manufacturing for Active Workspace (Easy Plan)
- Use the basic Active Workspace environment
- Identify MBOM management in Easy Plan
- View the EBOM in the 3D viewer
- Manage a manufacturing part list (MBOM)(part 1)
- Manage a manufacturing part list (MBOM)(part 2) (start chapter)
- Manage a manufacturing part list (MBOM)(part 2) (finish chapter)
- Release and revise MBOM assemblies: Manage change
- Identify Easy Plan for BTS/BTO/CTO production process planning
- Search and navigate a plant BOP structure in Easy Plan
- Perform functional planning with the product BOP in Easy Plan
- Perform line balancing in Easy Plan
- Perform operation planning in the plant BOP in Easy Plan
- Work with the BOE in Easy Plan
- Author work instructions in Easy Plan

Type

Face-to-face training

Duration

3 days
