

Process Gaschromatograph MAXUM edition II Operation and maintenance (SC-C-MAX1)

Kurzbeschreibung

Basics of gas chromatography

Introduction into the Process Gas Chromatograph MAXUM edition II: electronics, analytics, HMI, Gas Chromatograph Portal software structure, archiving, networking, addresses

Zielgruppe

Service personnel

Project managers, project team members

Commissioning engineers, configuring engineers

Operators, users

Inhalte

- Introduction into chromatography
- Physical structure and electronic design of MAXUM edition II process gas chromatograph
- Analytical functions, hardware modules, electronic and analytical
- Workstation and structure of the software; devices for networking and prepare the PC
- Networking: addresses, IP, Loop, Unit Ethernet, DataNet, CAN boards
- MAXUM database: MAXUM table editor, HMI, online operation
- I/O tables, alarms, the AMD-File, backup and restore
- Operation with GCP: application, sequences, methods
- Peak tables and integration parameters
- Data sheet and nomenclature
- Valves: Model 50 and liquid injection valve
- Applets and use of detectors
- Column switching, electronic pressure regulators and flow adjustment
- Development of a method

Teilnahmevoraussetzung

Basic knowledge in process analytics

Typ

Präsenztraining

Dauer

4,5 Tage
