

Level Measurement - Technology and Sales (SC-PI2-T1E)

Objectives

Participants will get advanced knowledge on level measurement. Covering product lines and common applications, participants learn about point and continuous level measurement, product features, product selection and troubleshooting.

Target Group

- Users in the field of process instrumentation
- Sales personnel/ service personnel
- Commissioning engineers, configuring engineers

Content

Combined hands-on training and theory for level measurement:

- Measurement principles
 - The Siemens product portfolio SITRANS L and their technical specifications (e.g. radar, ultrasonic and static weighing)
 - Handling, operation, commissioning, including remote control via SIMATIC PDM
- Diagnostics

Prerequisites

- Basic knowledge of process instrumentation technology
- General knowledge of electrical engineering

Type

Face-to-face training

Duration

3 days

Language

en
