

Durchflussmessung - Technologie (SC-PI3-T1E)

Objectives

Participants will get advanced knowledge on flow measurement.

Covering the flow product lines and common applications, participants learn the principles of flow measurement, product features, product selection for applications as well as troubleshooting.

Target Group

- Users in the field of process instrumentation
- Sales personnel/ service personnel
- Commissioning engineers, configuring engineers

Content

Combined hands-on training and theory for the flow measurement technologies

- Measurement principles
- The Siemens product portfolio SITRANS F and their technical specifications
- Handling, operation, commissioning, including remote control via SIMATIC PDM
- Applications and product selection
- Diagnostics

Prerequisites

- Basic knowledge of process instrumentation technology
- General knowledge of electrical engineering

Type

Face-to-face training

Duration

3 days

Language

en
