

Service Training Process Instrumentation for Partners - Positioners (SC-PI-SP-P)

Short Description

Service Partner Training - Positioners

On-site service is an important part of our business. Customers expect competent and fast assistance from regional contacts.

Objectives

The Partner Training service provides participants with the basics of installation, commissioning, fault detection, and maintenance of SIEMENS positioners.

Target Group

MI service partners who are responsible for installation, commissioning, maintenance, and servicing.

Content

Training of theoretical knowledge on technologies and applications.

Conducting practical exercises on equipment for assembly, commissioning, troubleshooting, and maintenance.

- SIPART PS2
- SIPART PS100

Prerequisites

Experience in handling process measurement technology devices. Knowledge of SIEMENS devices is an advantage, but not a requirement.

Note

This course is only for candidates of the Solution Partner Program. To participate, you must have successfully completed the on-demand training units in the Partner Academy for this service module. When booking, you must present your training certificate as evidence.

Please bring your own laptop.

Type
