

## Online-Training - ULTRAMAT 6 Advanced user (SC-G-ULT6)

---

### Short Description

---

Online-Training  
Commissioning and operation of ULTRAMAT 6  
Diagnostics  
infrared absorption  
NDIR principle  
sample preparation

[Also available as face-to-face training](#)

### Target Group

---

- Service personnel
- Commissioning engineers
- Configuring engineers
- Project manager
- Project team members
- Operators
- Users

### Content

---

- Infrared absorption according to the NDIR principle, micro flow sensor
- Measurement of infrared active gases
- Splitted beam infrared cell, phase adjustment
- Structure and function of analyzers controlled by microprocessors
- Commissioning and use of the ULTRAMAT 6
- Preventive maintenance
- Operation, parameters, maintenance software, failure diagnosis and remedy
- Practical exercises in the laboratory

### Prerequisites

---

- Basic knowledge process gas analytics
- General knowledge of electrical engineering

### Type

---

Online-Training

### Duration

---

3 days

### Language

---

en
