

Online-Training - Pressure Technology - Basics (SC-PI-P)

Objectives

Participants will get basic knowledge on pressure measurement. The attendees will acquire knowledge about of the different types of pressure, how to find the suitable customer's solution using the catalog.

Target Group

- Sales personnel
- Users in the field of process instrumentation
- Configuring engineers

Content

- Basics pressure measurement
- The Siemens product portfolio SITRANS P and their technical specifications
- SITRANS P320 / P420 Measuring cells
- Ordering example

Prerequisites

- Basic knowledge of process instrumentation technology
- General knowledge of electrical engineering

Type

Online-Training

Duration

6 hours
