

Online-Training - Temperature Technology - Basics (SC-PI-T)

Objectives

Participants will get basic knowledge on temperature measurement. The attendees will acquire knowledge about how to measure temperature, how to find the suitable customer's solution using the catalog.

Target Group

- Sales personnel
- Users in the field of process instrumentation
- Configuring engineers

Content

- Basic theory for the technology temperature
 - Basics temperature measurement
 - The Siemens product portfolio SITRANS T and their technical specifications
 - Ordering example

Prerequisites

- Basic knowledge of process instrumentation technology
- General knowledge of electrical engineering

Type

Online-Training

Duration

3 hours
