

SINUMERIK Programming 1 (NC-PRO1)

Short Description

In this course, you will learn how to operate machine tools using the control panel. You will create simple NC programs and modify existing NC programs.

Objectives

Your tasks will include operating machine tools via the control panel. You will create simple NC programs and modify existing NC programs. After the course, you will be able to work with the SINUMERIK Operate user interface. You will be able to import and modify programs and back up data. You will know the basics of NC programming and be able to create programs for simple components.

Target Group

Operators
Programmers

Content

SINUMERIK system overview
Operator panel and machine control panel
Operating modes, operating areas, operator controls
File system, editor
Principles of programming
Tool offset data and tool management
Recompilation and parameterization of standard cycles
Data backup of programs
Practical operating exercises based on given NC programs on training devices

Prerequisites

Basic knowledge of automation

Note

This course is suitable for users of the Siemens SINUMERIK ONE, SINUMERIK 828 and SINUMERIK 840D sl control systems. The user interface is the same in each case.

This course is the successor to the NC-SINOP-B course. The content is comparable and updated.

Dates will be offered from 01.01.2025. For dates in 2024, please see NC-SINOP-B.

Type

Face-to-face training

Duration

5 days
