

SINUMERIK ONE Upgrade (NC-ONE-UP)

Short Description

Based on your good know-how on the SINUMERIK Solution Line, this course will provide the knowledge for the project planning and commissioning of the SINUMERIK ONE, as well as the knowledge to create and test different machine configurations.

Objectives

Based on your good know-how on the SINUMERIK Solution Line, this course will provide you with the knowledge for the project planning and commissioning of the SINUMERIK ONE as digital twin and real, as well as the knowledge to create and test different system configurations. In practical exercises, you train commissioning and service on training equipment.

After the course ends, you will master the commissioning of the SINUMERIK ONE control system with a SINAMICS S120 drive. By knowing the various functions of the controller, you are able to optimally adapt the control to the machine and thus maximize the productivity of your machine.

Target Group

Commissioning engineers Engineering personnel

Content

Overview and components of SINUMERIK ONE Overview of SINUMERIK ONE functionality

Data backup of the SSD/SD, recommissioning, SW upgrade

Commissioning of the digital twin with TIA portal and CreateMyVirtualMachine

Adaptation of the control functions to the machine with machine data and interface signals

Machine kinematics and collision monitoring

Transfer of data to the real machine

Drive commissioning and axle assignment

Practical commissioning exercises on the PC (digital twin) as well as on a SINUMERIK training device

Prerequisites

Basic knowledge of the TIA portal

Good knowledge of the SINUMERIK 840DSL according to the course NC-84SL-SIP

Relevant education, knowledge and experience to enable him or her to analyze risks and to avoid hazards which electricity could create

Relevant education, knowledge and experience to enable him or her to analyze risks and to avoid nazards which electricity could create.
