

Online-Training - TIA Portal Openness Programmierung 1 (DI-OPEN1)

Short Description

The aim of the course is to provide you with an introduction to programming with C#. You will learn the basics of the range of languages and performance of the Openness API in Visual Studio and how to use the C# programming language.

In order to provide you with the best possible support and training in your personal learning environment (own office/home office), we have implemented selected courses as digital online trainings for you. We provide you with live theory lectures from our experts, which convey the course content described in the learning objectives in a practical and comprehensive manner, utilizing our virtual exercise environment for practical exercises. In our virtual classroom, our expert is also available to you at any time during your individual practical exercises for in-depth questions and technical discussions.

[Also available as face-to-face training](#)

Objectives

TIA Portal Openness is the API or programming interface provided with the TIA Portal, with which you can efficiently automate engineering tasks without using the TIA Portal itself. This includes tasks such as project management, configuration and parameterization of hardware, automatic generation of block code as well as various online functions.

During the training, you will create, commission and test your own simple Openness applications. The course will introduce you to the programming language C# in combination to TIA Portal Openness.

By the end of the course you will be able to:

- Program with Visual Studio and the C# programming language
- Create small applications with TIA Openness

Target Group

Programmers
Configuring engineers

Content

Introduction to Visual Studio and the C# programming language
Control structures (branches and loops)
Introduction to the most important data types integrated in C#
Using of methods
Introduction to the structure of classes and the object-oriented programming concept of C#
Introduction to the use of interfaces with Windows forms
Introduction to TIA Portal Openness
Tools for debugging programs
outsourcing of recurring tasks to methods

Prerequisites

SIMATIC knowledge in the context of TIA-PRO1 or TIA-SYSUP
▪ [Technical requirements](#) > VE Lab

Type

Online-Training

Duration

3 days

Language

de
