

## Online-Training - Pressure Technology - Basics (SC-PI-P)

---

### Objectives

---

Participants will get basic knowledge on pressure measurement. The attendees will acquire knowledge about of the different types of pressure, how to find the suitable customer's solution using the catalog.

### Target Group

---

- Sales personnel
- Users in the field of process instrumentation
- Configuring engineers

### Content

---

- Basics pressure measurement
- The Siemens product portfolio SITRANS P and their technical specifications
- SITRANS P320 / P420 Measuring cells
- Ordering example

### Prerequisites

---

- Basic knowledge of process instrumentation technology
- General knowledge of electrical engineering

### Type

---

Online-Training

### Duration

---

6 hours

### Language

---
