

## Weighing Technology Overview and Certification (SC-WT-CWS)

---

### Objectives

---

Participants get an overview of the weighing product portfolio (SIWAREX load cells and electronics, belt scales, weighfeeders and solids flowmeters) as well as on the physical measuring principles.

You will learn how to select and configure weighing devices and get to know applications in different industries.

At the end you will test your knowledge and get certified to deliver competent support to customers.

### Target Group

---

- Siemens Sales (Dedicated, Area, Vertical, OEM)
- Technical Support
- Employees planning & designing scales
- Service staff, operators
- New employees at Siemens Process Automation / Instrumentation

### Content

---

Combined hands-on and theory training for weighing technology

- Basic principles of the technologies
- SIWAREX load cells, mounting systems and weighing processors
- MILLTRONICS belt scales, solids flowmeters and weighfeeders
- Dimensioning and integration of scales into the plant and the process system
- Certification Test

### Type

---

Face-to-face training

### Duration

---

4 days

### Language

---
