# SIEMENS

## Online-Training - SIMIT in Process Automation (ST-PCS7SIM)

**Short Description**

In this online course in a virtual classroom you will get to know the software by using the simulation software SIMIT and get an overview of the functions and libraries in the process automation environment.

**Objectives**

By doing exercises in a virtual training environment and practical examples, you will learn about the design of simulations / simulation models for testing the PCS 7 automation software. The perfect interaction of all components integrated in SIMIT enables you to produce more in the highest quality over the long term and to establish new products on the market much more quickly.

On completion of the course you are able to:
- create your own components and templates
- to use the possibilities of effective engineering in SIMIT
- to establish couplings between the simulation in SIMIT and PCS 7 automation systems that are emulated with PLCSIM or a virtual controller.

**Target Group**

- Project manager, Configuring engineers
- Programmers
- Commissioning engineers
- Technologists

**Content**

- Interfaces to controllers or other applications
- Introduction of the 3 simulation levels and their function
- Creation of templates and efficient engineering by import functions
- Working with libraries provided by SIMIT
- Creation of own components using the Component Type Editor
- Insight into the message system and the Automation Control Interface of SIMIT
- Creation of small simulation prrojects
- Configuration of a distributed simulation using the Virtual Controller

**Prerequisites**

- Basic knowledge of electrical engineering, control and feedback control systems and process control engineering.
- Attendance of the system course "ST-PCS7SYS" is recommended
- Practical experience in the project planning of SIMATIC PCS 7

**Technical requirements**

For the online training is a virtual training environment required, which is provided by us.
We recommend that you consider the technical requirements for the best possible use.
- Information on the technical requirements with VLab

**Note**

Course language is English.

**Type**

Online-Training

**Duration**

3.5 days

**Language**

en
