

## Market Access Requirements for Control Cabinets and Electrical Equipment of Machines according to DIN EN 60204-1 (LV-IEC-MOD2)

---

### Short Description

---

Get to know the market access requirements and relevant standards necessary for successfully delivering electrical equipment for machines in Europe and other IEC markets. With this seminar, we aim to explain the technical requirements from the important standards and demonstrate solutions on how you can meet selected requirements economically and efficiently.

### Target Group

---

Manufacturer of machine control cabinets, electrical designers of OEM machines and plants, commissioning engineers

### Content

---

Regulations, directives, standards for electrical equipment of machines  
Power supply and supply disconnecting devices  
Overview of protective measures  
Short-circuit strength with design guidelines  
Protection by enclosure  
Protection by disconnection  
Protection of conductors and cables  
Protection against overvoltage's  
Protection of Control circuits  
Additional information on DIN EN 60204-1

### Prerequisites

---

Basic knowledge of electrical engineering

### Type

---

Face-to-face training

### Duration

---

1 day

### Language

---

en
