

IZAR@SET TEST LAB software for SITRANS FUE950 (FUE950D)

Target Group

Customers who have bought the SITRANS FUE950 with the following accessory: TestLab version of re-programming tool for FUE950 (Article No. A5E03461778)

Content

The Siemens SITRANS FUE950 is based on the Hydrometer version SCYLAT INT8 and therefore the IZAR@SET TEST LAB software from Hydrometer can be used.

The following short training material instructs users on this software tool and helps understanding how to use the test-lab dongle for this software tool, together with the FUE950.

It is recommended to read the following pages before using the IZAR@SET TEST LAB software with the TEST LAB dongle.
