

## SIMOCRANE Crane Management System CMS Engineering (CR-CMS\_E)

---

### Short Description

---

The SIMOCRANE crane management system (CMS) is a PC-based visualization software (SCADA) providing operational data and diagnostic information for crane operators, maintenance personnel, and plant operators by means of an intuitive navigation interface. Get insight into the crane data applications with the right information at the right time.

### Objectives

---

The goal of this training is to get engineers ready to engineer and commission with SIMOCRANE CMS solutions of Siemens Cranes. In this 5 day training the participants will learn on installing and configuration of CMS interfaces, special functions and how to customize to project specific requirements.

### Target Group

---

- Cranes Programmers
- Cranes Commissioning engineers
- Cranes Configuring engineers
- Cranes Service personnel

### Content

---

This course contents is:

- Introduction to CMS
- Installation
- Product Configuration
- Replay Function
- Product and Application
- Configuring the Application
- PLC Interfacing
- Interface Blocks
- Advanced Blocks
- The training is complemented with exercises

### Prerequisites

---

Advanced knowhow in Simatic WinCC (ST-BWINCCS)  
Advanced knowhow TIA Portal V17 (current version)

### Type

---

Face-to-face training

### Duration

---

4 days

### Language

---

en

### Fee

---

2,200 EUR
