

SF6 Bewustwording training (H-SF6-BWO)

Objectives

Raising awareness among participants about the properties of SF6 [Sulfur Hexafluoride] gas and the environmental consequences of its improper use.

Target Group

This course is intended for:

- Work preparers
- Supervisors
- Previously certified individuals for refresher/repeat courses
- Employees working near SF6 installations (VOPs)
- Employees operating SF6 installations (VP, IV, WV, OIV)

Content

Theory:

- Relevant environmental issues, particularly greenhouse effects
- The European Regulation EU 517-2014 on fluorinated (F-) gases
- The European Regulation EU 2015-2066 on training requirements for personnel
- The standards IEC 60376 and IEC 60480 and the measurement of gas qualities
- Gas theory, emission determination, and safety
- The standard IEC 62271-4 and its required training module: A - Awareness

Prerequisites

General knowledge of energy technology.

Note

This course includes theory and practical assignments.

Type

Face-to-face training

Duration

1 day

Language

nl

Fee

875 EUR
