

Simotion programming (MC-SMO-PM)

Objectives

You will learn how to configure and start up the SIMOTION Motion Control system with the associated drives and visualization devices. The course also includes the programming of movement sequences with the help of Motion Control Chart and ladder diagram/function block diagram.

The technologies positioning, synchronous operation, probe, and cam plates are explained and reinforced by means of practice-oriented examples. The course enables you to use SIMOTION optimally in the automation of production machinery.

Content

System overview of SIMOTION

Components of SIMOTION

- SCOUT engineering system and option packages
- Hardware platforms
- Motion control technology packages

Creating a project with SCOUT

Starting up and optimizing axes

Programming user programs with MCC (Motion Control Chart) and LAD/FBD

Runtime system (task system) configuring

Learning to use tools for fault diagnostics

Performing practical exercises on training devices

Prerequisites

Knowledge corresponding to the training course Simatic S7 programming 1 and knowledge about drive systems.

Note

The training is in Swedish language with english course material.

Simotion and Sinamics S120 are used for practical exercises.

Type

Face-to-face training

Duration

4 days

Language

sv

Fee

31,900 SEK
