
SIMATIC - Motion Control in the TIA Portal (TIA-MC) (TIA-MC)

Short Description

In this course, you will learn to program the motion control functions integrated in the SIMATIC S7-1500 or S7-1200 controllers using TIA Portal. Core topics are the technology objects speed axis, positioning axis and synchronous axis with practical exercises on training devices (SIMATIC S7-1500 and SINAMICS).

Objectives

You will program the SIMATIC S7-1500 or S7-1200 controllers in TIA Portal. You will be able to precisely control the motion of axes with the integrated motion control functions.
In this technology course, you will learn step by step the benefits and the use of these functions. After each learning step, you will deepen your knowledge with hands-on programming.
After attending the course you will understand the interaction of the technological functions. You will be able to select and configure appropriate technology objects, such as speed axis, positioning axis and synchronous axis, and integrate them in your program.

Target Group

Programmer
Commissioning engineers
Engineering personnel

Content

- Overview of the S7-1500T Technology-CPU, basics of Motion Control
- SpeedAxis and PositioningAxis technology objects
- Programming with Motion Control instructions
- Homing and traversing movements
- Closed-loop control and optimization
- Error messages and diagnostics
- Output cam and measuring input technology object
- SynchronousAxis technology object
- Absolute and relative gearing
- Cam discs technology object
- Kinematics technology object
- Interplay between Motion Control and Safety Integrated
- Practical exercises on training devices with SIMATIC S7-1500(T) and SINAMICS drives

Prerequisites

Knowledge of programming in the TIA Portal (equivalent to knowledge after completion of the TIA-PRO1 or TIA-SERV2 course).

Type

Face-to-face training

Duration

5 days

Language

pl
