

Desigo Optic (TDK03WBT)

简要介绍

Education in Desigo Optic

培训目的

The training is aimed at engineers who need to learn how to set up a project in Desigo Optic, using an edge device or a computer with Desigo Optic Server Software. In the training environment, we develop BACnet devices with graphics, schedulers, and data from historical trends. You will learn about different settings for how we can establish connectivity to BACnet devices and how to do both online and offline engineering.

培训对象

You are tasked with creating and/or editing a Desigo Optic project. In this training, we will guide you in how to set up a project. You will gain insight into how Desigo Optic is designed, how we add content and give the end user a good experience.

课程内容
