

Industrial Communication / Промышленные коммуникации (сверхсвет) (SILPP-P03)

Content

The efficient combination of information and automation engineering is the basis for process optimization in all industries. Siemens has a general supply of products for industrial communication from the field level up to the enterprise level.

Note

By default this E-Learning starts just with descriptive text and without voice. If requested you can switch it on by clicking the speaker icon in the header. Please note that the voice is a computer voice and therefore the pronunciation of individual product names can occasionally sound unnatural.
