

FM MAG 8000 - Product Introduction (SILPP-PD21)

Content

In this eLearning module, you will learn what a water meter is along with the features, benefits and advantages it can offer in regards to the smart water concept. You will also receive information about the drinking water regulations and custody transfer standards prevalent in different regions. Finally, you will see examples of how features such as a long battery lifetime, degree of protection, communication options and available operational data help customers to improve their processes.
