

## SITOP UPS1600 – Open and system-integrated DC UPS (SILPP-SI11)

---

### Contenido

---

In this part you will learn how the system-integrated UPS1600 uninterruptable power supply works to buffer power failures. After completing this chapter, you will be able to independently configure a UPS1600. Once you have completed this part, you can also commission the software for the UPS1600 and perform an initial parameter assignment.
