

Chemical - Process Instrumentation Portfolio - Chapter 1 (SILPP-PD17)

Conteúdo

In this e-learning module we will start with a brief introduction to the chemical industry, followed by a look at some of the important requirements both the industry and the customer may have. We will then dive into the Process Instrumentation portfolio fulfilling these requirements, concentrating on flow, temperature and weighing devices. In chapter 2, we will cover level, pressure and positioner devices.
