

Oil and Gas - General Introduction (SILPP-PD20)

Conteúdo

In this eLearning module we will introduce you to some basics about natural oil and natural gas. We will start with a brief introduction to how they form, where they are located and how they are extracted. We will also provide you with some historical facts about the unit "bbl" and information about the value of oil and gas as well as the benchmarking system for these raw materials. We will conclude the module with a collection of available sales tools for the oil and gas industry.
