

SIMOTION - Programming Advanced / SIMOTION - İeri Programlama (MC-SMO-PA)

Objectives

Building on the knowledge gained in the SIMOTION system and programming course, you will learn the advanced programming facilities with Structured Text and Motion Control Chart.

The applications for the technologies are reinforced using selected examples on our exercise equipment.

On completion of the course, you will be able to create parameterizable blocks such as FCs and FBs with the help of the Structured Text language. With knowledge of the cam plate function, you will be able to parameterize and program cam plate synchronization.

This extends your scope for creating programs for your production machine.

Target Group

Programmers

Commissioning engineers, configuring engineers

Service personnel

Content

Introduction to creating user programs with Structured Text

Creating variables and data structures in ST-Units

Creating re-usable blocks (FCs and FBs)

Programming commands for motion control

Creating cam plates with CAM EDIT and using system functions

Parameterizing and programming cam plate synchronization

Overview of communication with OPC and UDP

Practical exercises using application examples

Prerequisites

SINAMICS S120 and Simotion MC-SMO-SYS course knowledge

Type

Face-to-face training

Duration

5 days

Language

tr

Fee

9,000 TRY

(price without 18% VAT)
