

## PROFINET System (IK-PNSYS)

---

### Objectives

---

Learn about the future-oriented PROFINET as the open Industrial Ethernet standard for automation from Siemens as a member of PROFIBUS International (PI).

Using SIMATIC NET components, you will learn how to parameterize, start up and troubleshoot a PROFINET network quickly and effectively.

Numerous practical exercises reinforce the theoretical knowledge acquired.

### Target Group

---

Programmers  
Commissioning engineers  
Engineering personnel  
Maintenance personnel  
Service personnel  
Operators

### Content

---

Fundamentals of PROFINET IO with configuring and programming, as well as fundamentals of PROFINET RT&IRT

Integration of conventional DP systems via PROFINET devices with proxy functionality

Cross-vendor, plant-wide engineering & diagnostics with the engineering tool

Installation guidelines for PROFINET IO networks

Introduction of the integrated Web-services in the PROFINET devices

Extensive practical examples with exercises

### Prerequisites

---

SIMATIC S7 knowledge according to ST-PRO2 or ST-SERV2 or S7-SYS2

### Type

---

Face-to-face training

### Duration

---

3 days

### Language

---

tr

### Fee

---

528 EUR

( price without 20% VAT )
