

Online-Training SIMATIC WinCC flexible, system course 1 / Online-Kurs SIMATIC WinCC Flexible basic (ST-WCCFSYS)

Objectives

This live online course, provides you with the basic knowledge necessary for configuring machine-specific and plant-specific human machine interface tasks with the SIMATIC WinCC flexible software.

The course content is supported with practical exercises on a plant model. This consists of an S7-300 automation system and different human machine interface stations.

On completion of the course, you will be able to work efficiently with WinCC flexible and create an optimal configuration for any given requirement. With confident handling, you will be able to make effective use of the engineering phase
In these course you will work with the SIMATIC WinCC flexible 2008 software.

Target Group

Programmers
Commissioning engineers, configuring engineers
Service personnel
Operators, users
Maintenance personnel

Content

System overview of SIMATIC WinCC flexible
Creating the project
Configuring connections to SIMATIC S7
Fundamentals of graphics display creation for human machine interfacing
User administration
Message representation, message archiving, message configuring
Variable archiving, configuring curves, representing curves
Recipes
Handling different human machine interface stations

Prerequisites

Basic knowledge of automatization

Additionally an online entrance test is available for you. So you may assure that the course of your choice fits to your competences
