SIEMENS

S7 Programmer Examination Module (CP-FAP)

Short Description

This is the examination module for those personnel who have completed the required pre-requisite Siemens S7 courses and wish to enter the examination for Siemens Certified S7 Programmer.

Objectives

The objective of this examination is to award successful candidates who have demonstrated their knowledge and competence of S7 programming the Siemens S7 Programmer Certificate.

Content

The examination is a combination of theoretical and practical tasks to test understanding and competence. Each candidate is provided with an S7 TIA training system for the purposes of completing the examination. This assessment is carried out under formal examination conditions. Please note it is essential that participants bring their Sitrain documentation/ notes from the Sitrain pre-requisite courses they attended to the examination session. It will be required to complete the examination tasks. This documentation will not be provided by Siemens for candidates to undertake the examination session.

Prerequisites

PC literacy, keyboard/ mouse skills and a working knowledge of MS Windows enabling the participant to:-
Open and Close programs
Locate files
Copy and paste files, objects and data (text, etc.)
Drag and drop files, objects and data (text, etc.)
