

Introduction to Controls and Programming (BT-ICP)

Short Description

Provides an introduction to controls and control theory for engineers who are new to this field. Basic control theory is covered, along with exercises to show how control strategies are implemented in the Desigo PX range. This course covers relevant topics at a simple level, in preparation for the Desigo PX Engineering course

Prerequisites

Course participants should have enthusiasm and a willingness to learn about controls.

Type

Face-to-face training
