

Introduction to Digitalization (DI-INTROC)

Short Description

Introduction to Digitalization

Objectives

Digital Enterprise, your path to Industry 4.0 - discover the possibilities. Today's technologies are so complex that, in order to keep up to date, it is almost essential for the training to be performed on the software and the associated training devices.

The target group of this course is comprised of configuration engineers, project planners and decision-makers working in medium-sized and large-scale industrial companies, who are working on end-to-end digitalization concepts.

The course gives you an introduction into the Totally Integrated Automation in the Digital Enterprise

As your path toward Industry 4.0 and an overview of the various software solutions, so that you will be able to assess them after completing the course.

You are given not only a theoretical overview but also gain further insights into the possibilities of Digital Enterprise through practical demonstrations

Target Group

Decision makers

Sales personnel

Planners

Content

Digitalization - Industry 4.0

Automatic execution of engineering tasks

PLM-integration of automation engineering

Efficient cloud-based engineering

Virtual commissioning

Integrated energy management

Protection of machines and plants

Data acquisition for cloud services

Prerequisites

Basic knowledge of automation engineering

Type

Face-to-face training

Duration

1 day

Language

en
