

IMIT in Process Automation (ST-PCS7SIM)

Krátký popis

In this face-to-face course you will get to know the software by using the simulation software IMIT and get an overview of the functions and libraries in the process automation environment.

Cíle školení

By doing exercises on original SIMATIC PCS 7 training devices and practical examples, you will learn step by step how to design simulations / models for testing PCS 7 automation software. The perfect interaction of all components integrated in IMIT enables you to produce more in the highest quality over the long term and to establish new products on the market much more quickly.

On completion of the course you are able to:

- create your own components and templates
- to use the possibilities of effective engineering in IMIT
- to establish couplings between the simulation in IMIT and PCS 7 automation systems that are emulated with PLCSIM or a virtual controller.

Cílová skupina

- Project manager, Configuring engineers
- Programmers
- Commissioning engineers
- Technologists

Obsah školení

- Interfaces to controllers or other applications
- Introduction of the 3 simulation levels and their function
- Creation of templates and efficient engineering by import functions
- Working with libraries provided by IMIT
- Creation of own components using the Component Type Editor
- Insight into the message system and the Automation Control Interface of IMIT
- Creation of small simulation projects
- Configuration of a distributed simulation using the Virtual Controller

Vstupní požadavky na účastníka

- Basic knowledge of electrical engineering, control and feedback control systems and process control engineering.
- Attendance of the system course "[ST-PCS7SYS](#)" is recommended
- Practical experience in the project planning of SIMATIC PCS 7

Poznámky

Included in the course price: Free access to the digital learning platform [SITRAIN access](#) – starting one week before the start of the course until two weeks after the end of the course.

With the Learning Membership, you can deepen or repeat the content of this Learning Event as well as continue your education on other interesting topics.

Course language is English.
