

Global Skills through local engagement

Siemens Mechatronic Systems Certification Program

Information for Schools

Siemens, one of the world's largest high-tech manufacturing corporations, is a leader in complex technologies, particularly in complex systems integrating electrical, mechanical and computer engineering. The marriage of these three engineering fields, better known as mechatronic systems, plays an ever-increasing role in modern technology. Because technologies become more complex each year, we build relationships with qualified partner schools to educate competent and motivated personnel. The Siemens Technik Akademie Berlin has developed a comprehensive industry skill certification, the Siemens Mechatronic Systems Certification Program, offered together with our partner schools worldwide.

SIEMENS

Siemens Mechatronic Systems Certification Program

Against the backdrop of the technical dominance of Siemens in the automation and mechatronic sectors, as well as the growing number of areas in which integrated mechatronic systems are being used around the world, the demand for qualified and competent personnel is increasing. To guarantee a world-class technical skills standard, the Siemens Technik Akademie Berlin is interested in cooperating with qualified colleges or universities around the world and offer an industrial certificate to students who are educated by certified teachers working for the partner schools. Along with specialized technical content, the Siemens Mechatronic Systems Certification Program focuses on providing a wide range of skills in trouble-shooting and systems-thinking.

Siemens Certified Partner Schools

Partnership for the Siemens Mechatronic Systems Certification Program means mutual give-and-take. Our partnerships are based on cooperation through beneficial activities in program development, research, and teaching. You can find a list of our current partner schools on our website.

Benefits for Schools

- Mark of distinction as a certified Siemens education partner.
- Recognition as a provider of the Siemens Mechatronic Systems Certification Exams.
- Collaboration opportunities with the Siemens Technik Akademie Berlin to advance and promote Mechatronics education on a local, national, and international level.
- Access to an international network of Mechatronics and advanced technology educators and industry partners.

Key Aspects of Partnership

- SMSCP Partner Schools must have a mechatronic training system on site. (hardware requirements are listed on our homepage under downloads)
- Schools must have at least two certified teachers.
- The lectures must be held in the English language.
- There must be an agreement with Siemens in a written form.
- Program costs on request.

What we want to achieve by cooperating with you

VISION The Siemens Mechatronic Systems Certification Program aims to be the world's premier comprehensive skills qualification.

- MISSION**
- To establish the international industry standard comprehensive skills certification in mechatronic systems.
 - To provide the Siemens Technik Akademie Berlin's pedagogical and technical expertise to partner schools around the world.
 - To add value to our partner School's existing programs of study.
 - To learn from our customers and partners in order to improve our knowledge and program.
 - To develop Handlungskompetenz - adaptive, innovative thinking- in the world's workforce.
