

Training for industry

SITRAIN - Training direct from the Manufacturer

Siemens offers training straight from the manufacturer for all industry products and systems. SITRAIN provides more than 300 courses, covering basic, advanced, and specialised knowledge at more than 170 locations in more than 60 countries

The Sitrain worldwide training portfolio for industry covers the following topics:

- Drive technology
- Automation systems
- Communication
- Low-voltage control
Safety
- Process control systems
- Process Analytics

Three good reasons for training from Siemens:

1. Manufacturer's expertise:

As the manufacturer of the products, Siemens starts developing the appropriate training during the product development stage – a real advantage, from the perspective of time as well as knowledge.

2. Practical relevance:

The courses stand out for their wide range of practical exercises – half the course consists of hands on training. This means that the knowledge can be applied immediately in everyday work.

3. Flexible implementation:

Flexibility is the name of the game. The content as well as the location of the training can be customised to meet each customer's needs.

More than **300**
classroom courses

60,000 participants
annually

Training centres
at **170** locations
in more than **60**
countries

95% of course
participants would
recommend the
training to others
(TNS Infratest)

SITRAIN offers:

- Training directly from the manufacturer
- Basic and advanced courses on industry automation and drive system products
- Various learning methods, such as courses in a training centre or web-based training
- Professional trainers able to explain even complicated topics simply
- Practical courses with relevant exercise units on specially developed training devices
- High-quality course documents – so you can look up what you have learned at any time
- Training in one of our training centres or directly on site
- Standard training courses as well as training courses tailored to your individual requirements

Knowledge as a key success factor

State of the art knowledge, practical skills and competence become more and more decisive success factors against the background of rapid technological progress. Qualified employees are one of the most important resources of any company. This is particularly important in this age of demographic skill loss a major risk to ongoing business success. Sitrain can not only address training for new employees but refurbishment of existing staff skills with special options for new graduates and apprentices.
