Partner Learning Landscape

Learning Paths for Approved Partner – VAR Program Modules

Learning Paths list selected training measures to support our Partners' employees to **build up knowledge regarding a certain topic**

- These topics are **Portfolio** related and are equivalent to the so called “**Program Modules**”, which can be certified within the global Siemens Partner Program
- Learning Paths can be used to prepare for a certain **workshop**, which has to be visited by members of the global **Partner Program**
- All listed training measures are **accessible for Siemens Partners** (partially free of charge – partially with costs)
- All listed training measures are **linked**, to get detailed information
- Certain (marked) measures are accessible **only** for Siemens Partners which are **member of the global Partner Program**

*In case of any questions please contact your **local Siemens Contact***

Learning Paths for Approved Partner – VAR Program Modules

1 Basic Factory Automation

- SIMATIC S7 and SIMATIC HMI
- Industrial Communication

2 Advanced Factory Automation

- SIMATIC S7 and SIMATIC HMI
- Industrial Communication

3 Industrial Controls Electromechanical Products - SIRIUS

4 Industrial Controls Electronic & Communication capable Products and Systems – SIRIUS

5 Industrial Controls Safety Products and Systems – SIRIUS

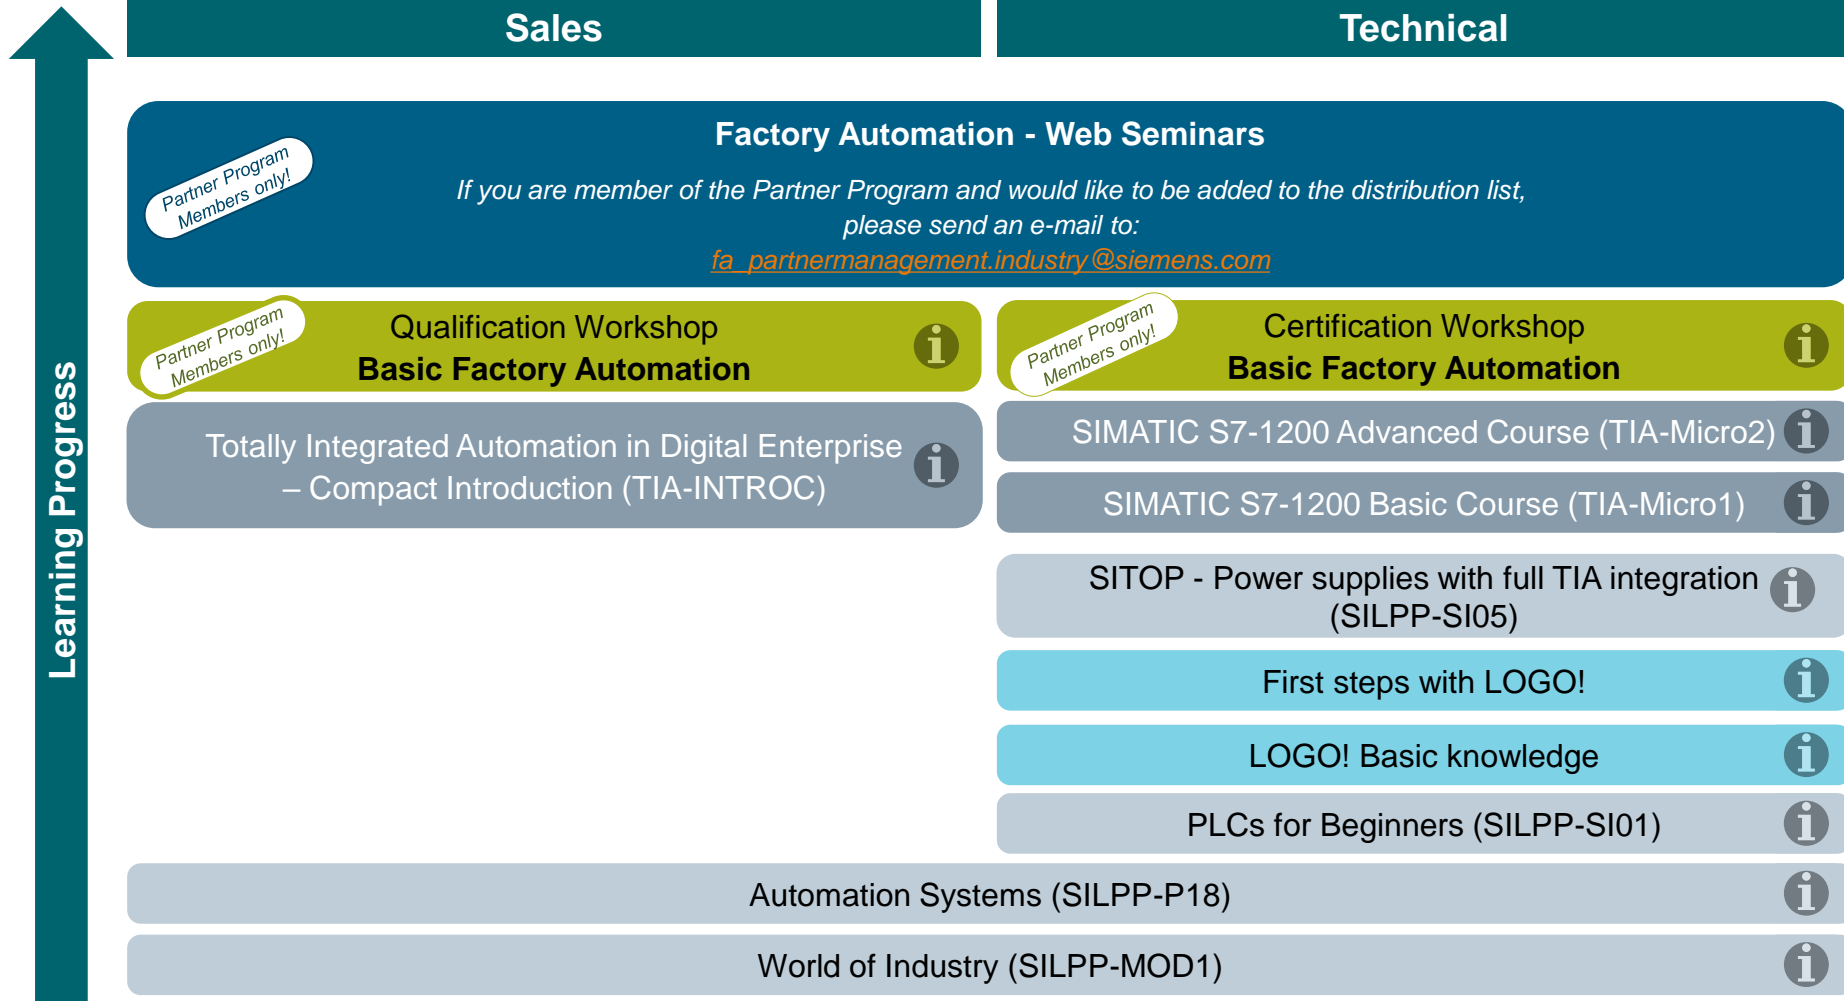

6 Drives & Motion (up to 250kW)

7 Process Instrumentation

8 Industrial Strength Networks

*min 2 technical employees have to pass **one of the six** Certification Workshops
Please note: We recommend to first take a Switching&Routing CWS and then a Wireless CWS;
However, the Switching&Routing CWS is no precondition for one of the other two
