

Basics of Digitalization in Automation (DI-INTRO)

Short Description

Digitalization is the answer to the most pressing requirements of our time in automation – namely increasingly shorter update cycles of products and technologies, as well as an ever-greater demand for flexibility in production. Discover holistic digitalization concepts of the future and take these ideas and solutions with you so that you can then make well-founded decisions for the future of your company. This course provides an introduction to digitalization in the field of discrete manufacturing and gives you an overview of current trends and which products in the Siemens Digital Industries portfolio will support you in digitization.

Objectives

You will have an overview of the latest technical developments in the field of discrete automation. You know the technologies to efficiently exploit the opportunities offered by digitalization in your company. You will be able to evaluate these ideas and solutions and make informed decisions for the future of your business.

Target Group

- Decision makers
- Project planners
- Automation engineers
- Sales staff

Content

- Standardization as the basis of digitalization
- Continuous Integration – methods and processes to optimize software development while improving the quality of deliverables
- Multiple users working together on a project
- Versioning and automated testing
- Engineering Automation Workflow (TIA Openness, TIA Add-Ins, SiVArc)
- Simulation at machine level (PLCSIM Advanced, SIMIT, NX MCD)
- Simulation at line and plant level (Simcenter/Amesim, Tecnomatix Process Simulate & Plant Simulation)
- Machine connectivity and integration (OPC UA, MQTT, PROFINET TSN, 5G)
- Industrial IoT & IT/OT convergence
- Cybersecurity

Included in the course price: Free access to the digital learning platform [SITRAIN access](#) – starting one week before the start of the course until two weeks after the end of the course. Here you will find web-based trainings on [Industrial Communication](#) as well as other topics such as [Digital Enterprise](#), [Industrial Automation Systems SIMATIC](#) and many more. With the Learning Membership, you can deepen or repeat the content of this learning event as well as continue your education on other interesting topics.

Prerequisites

- Basic knowledge of automation technology
- Basic knowledge of TIA Portal

Note

The Learning Membership starts 7 days before the start of the course and ends 14 days after the end of the course. During this period, you have access to all available web-based trainings.

Type

Face-to-face training

Duration

2 days

Language

en
