

PROFINET System Course (STEP 7 V5.x) (IC-PNSYS)

Objetivos

Learn about the future-oriented PROFINET as the open Industrial Ethernet standard for automation from Siemens as a member of PROFIBUS International (PI).

Using SIMATIC NET components, you will learn how to parameterize, start up and troubleshoot a PROFINET network quickly and effectively.

Numerous practical exercises reinforce the theoretical knowledge acquired.

Dirigido a

Programmers
Commissioning engineers
Engineering personnel
Maintenance personnel
Service personnel

Contenido

Basics of PROFINET IO with configuring and programming
Basics of PROFINET RT&IRT and media redundancy
Plant-wide engineering & diagnostics with the engineering tools
Introduction to the integrated Web-services in the PROFINET devices
Utilizing and configuring Shared Devices and I-Device
Extensive practical examples with exercises

Prerrequisitos

SIMATIC S7 knowledge according to ST-PRO2 or ST-SERV2

Additionally an online entrance test is available for you. So you may assure that the course of your choice fits to your competences.
