

Online Training - SIMATIC PCS 7 System Overview (ST-PCS7SOV)

Lyhyt kuvaus

This online training provides you with a sound overview of the SIMATIC PCS 7 process control system.

Tavoitteet

We present you a precise and comprehensive information package. Using typical practical applications and central configuring steps we explain the process control functions and central system aspects like modularity, scalability and integration.

You will also get to know and apply the configuring motto "Structuring not programming" and the associated savings in engineering costs with SIMATIC PCS 7.

Kohderyhmä

- Decision makers
- Sales personnel

Sisältö

- The system architecture
- The data flow in the process control system
- Library concept and project structure
- Basics of engineering with charts
- Efficient engineering
- Digitalization in the process industry

Edellytykset

- Basic knowledge of electrical engineering, control and feedback control systems and process control engineering.

Technical requirements

For the online training is a virtual training environment required, which is provided by us. We recommend that you consider the technical requirements for the best possible use.
