

Online Training - SIMATIC PCS 7 System Overview (ST-PCS7SOV)

Krótki opis

This online training provides you with a sound overview of the SIMATIC PCS 7 process control system.

Cel szkolenia

We present you a precise and comprehensive information package. Using typical practical applications and central configuring steps we explain the process control functions and central system aspects like modularity, scalability and integration.

You will also get to know and apply the configuring motto "Structuring not programming" and the associated savings in engineering costs with SIMATIC PCS 7.

Grupa docelowa

- Decision makers
- Sales personnel

Opis szkolenia

- The system architecture
- The data flow in the process control system
- Library concept and project structure
- Basics of engineering with charts
- Efficient engineering
- Digitalization in the process industry

Wstępne wymagania dla uczestnika

- Basic knowledge of electrical engineering, control and feedback control systems and process control engineering.

Technical requirements

For the online training is a virtual training environment required, which is provided by us. We recommend that you consider the technical requirements for the best possible use.
